

You create - We protect

StarForce MMOG

Anti-cheat and anti-bot protection
for online games

Problem 1

Vast majority of users become annoyed of unfair methods are used within online games.

Such methods disrupt game balance and making game process uninteresting

Problem 2

Using of special utilities (bots) in automated mode grants unfair users huge advantages.

Bot is thousand time faster, precise and agile than human. There is no way to compete with bot fairly

Result...

Massive usage of such methods leads to significant slide of interest and force payable audience to move towards another games.

Do you like this situation occurs within your virtual universe?
